Election/Restrictions

1. Applicant's election without traverse of Group I, claim 1-24, on 6/1/05 is acknowledged.
2. After further review of the Applicant's election, a further restriction of the elected claimed invention is as following:
 - I. Claims 1-13 draw to nonvolatile variable resistor, classified in class 338, subclass 174+.
 - II. Claims 14-24 draw to a memory device having cell being constituted of nonvolatile variable resistor, classified in class 365, subclass 158+.
3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because: the invention Group I does not require the particular memory device of the invention Group II, and the subcombination has separate utility such as the invention Group I can be used in any devices other than the memory device in Group II.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
